SATEPA

WATER AIR ELECTRONIC

the CUBE

WELCOME TO THE FUTURE

*The **CUBE** is the ideal partner for vapour mercury or amalgam single-lamp and double-lamp UV systems, both in stainless steel and HDPE. Exellent for every application, thanks to the proprietary control software, it also guarantees perfect sterilization in case of discontinous water flow. With its advanced features it allows UV system's optimal management, also thanks to the irradiation and temperature sensor connection.*
